

# Newsletter

**November 2013**

**International opportunities and events for  
students and graduates**

**Love your career? Love Airbus**

## [Current open positions for students and graduates](#)

This is the new edition of the Airbus Newsletter focusing on career opportunities in Airbus. Information about open graduate positions and early career entry programmes can be found on our career website at [www.airbus.com/work](http://www.airbus.com/work). Most roles can be accessed by clicking the “Apply Now” button except where stated otherwise. The positions listed for Airbus will be visible on the system as long as they are available. Once a position has been filled the reference and job description will disappear, so we encourage you to be proactive in applying.

## **DIRECT ENTRY GRADUATES (DEG) PROGRAMME IN THE UK**

The application process for our 2014 Direct Entry Graduate (DEG) Programme in the UK is **OPEN** for applications until 29<sup>th</sup> November 2013. It is a 2 year programme (3 years for Finance) that offers structured placements and focused training, tailored to you. To find out more and **apply**, visit: <http://www.airbus.com/work/earlycareers/graduates/deg/> before the closing date.

The Master of Engineering in Aircraft Systems Integration, sponsored by EADS-Spain, has been specifically designed for recent graduate engineers, and working professionals who want to develop and lead projects of Systems Integration. Of courses are given in English by internationally recognized in their fields coming from the key players in the aeronautical business, including industry, academia, government and regulators.

### **Student Profile:**

- Graduates in Engineering  
    Preferably: Aeronautical/Aerospace, Industrial, Telecommunication
- Demonstrated Proficiency in English
- International experience (work abroad programs, Erasmus...)

### **The Master**

There is no single degree that provides the solid technical background and the global vision of processes through all stages of an aircraft system's lifecycle required to become an engineer in systems integration. In fact, it usually takes many years of professional experience to achieve the required know-how, and for this reason there is not enough systems integration engineers to meet the demand of the leading high-tech aerospace companies.

To respond to the increasing demand for these professionals, Carlos III University of Madrid and EADS Spain have jointly designed the Master in Aircraft Systems Integration (MASI), a 1-year postgraduate program specifically aimed at recent graduate engineers, and working professionals, who want to develop and lead projects of Systems Integration.

## Application Period Now Open

We feel especially privileged to be able to offer a rigorous programme which **gives our students a decisive challenge, and an incomparable experience through the support of valuable professionals, currently employed in blue-chip companies.**

Our teaching **methodology is based on practical characteristics, training in small groups and the development of technical and personal skills**, adapted to the evolution and maturity of the students.

**Structure** EOI has designed an in-depth training programme in which theory and practice are combined **and delivered by business professionals, who introduce a realistic view of management.**

The EOI MBA is divided into **five modules and the final project. The EOI MBA is given in English.**

**Student Profile** Top University graduates (**engineering degree** and physics or mathematics degree), with less than 5 years of professional experience, who want to develop executive skills and obtain knowledge that will allow them to successfully pursue their professional careers in the most demanding companies.

**Fluently in English Language** is essential.
